

CelluClay® vs. FastMâché®

Two powerful papier mâché options—each with its own strengths.

Feature	CelluClay®	FastMâché®
Texture	Super fine and highly moldable; preferred by artists for detailed sculpting and texturing.	Slightly coarser; ideal for faster, general-purpose modeling and craft projects.
Drying Time	Moderate drying time allows for careful detailing and adjustments.	Quick-drying formula speeds up project completion.
Workability	Extremely versatile—can be pressed, pinched, coiled, rolled, or built over an armature.	Easy to shape and apply; best for simple forms and quicker results.
Use Case	Great for intricate, large-scale, or professional sculpting projects.	Perfect for classroom use, fast builds, and casual crafting.
Finish	Mimics a wide variety of textures and finishes; dries to a lightweight yet strong surface.	Dries to a hard, durable finish with minimal shrinkage.
Ages	Suitable for ages 6 and up.	Also great for users 6 and up.
Safety	Nontoxic and environmentally friendly.	Nontoxic and environmentally friendly.
